

Aryan Neupane

Junior GRC Analyst | Governance, Risk & Compliance

Kathmandu, Nepal | official.aryanneupane@gmail.com | [LinkedIn](#) | [GitHub](#) | [TryHackMe](#)

PROFESSIONAL SUMMARY

Early-career GRC analyst with hands-on experience building risk registers, control documentation, and evidence tracking aligned to ISO/IEC 27001:2022 and NIST Cybersecurity Framework (CSF) 2.0. Background includes internal audit support, control testing, and gap identification, along with a technical foundation in web application security testing. Built a simulated enterprise GRC portfolio project covering risk assessment, risk treatment, and compliance reporting. Comfortable working across governance, technical, and audit-facing security tasks.

CORE SKILLS

GRC: Risk Assessment, Risk Treatment, Security Controls, Control Testing, Evidence Management, Internal Audit Support, CAPA, Continual Improvement

Frameworks: ISO/IEC 27001:2022, NIST Cybersecurity Framework (CSF) 2.0

Security: Vulnerability Assessment, Web Application Security Testing, Security Testing

Tools: Burp Suite, Nmap, Nikto, Gobuster, Kali Linux, Git/GitHub, Microsoft Office

PROFESSIONAL EXPERIENCE

GRC Apprentice | *Synthbit Technologies*

Jul 2026 - Aug 2026 | On-site

- Applied ISO/IEC 27001:2022 and NIST CSF 2.0 concepts to practical GRC scenarios, mapping framework requirements to control and risk documentation.
- Developed and maintained risk registers, control registers, and control ownership matrices to support risk treatment planning.
- Performed control testing, evidence tracking, and gap identification to assess control effectiveness.
- Supported internal audit documentation, including audit findings, corrective actions, and continual improvement records.
- Built framework mappings and executive-level GRC reporting connecting risks, controls, evidence, and remediation status.

Cybersecurity Intern | *Synthbit Technologies*

May 2026 - Jul 2026 | Butwal, Lumbini, Nepal | On-site

- Performed web application security testing and vulnerability assessment in controlled lab environments.
- Conducted basic penetration testing to identify and validate common web application weaknesses, including SQL injection testing.
- Used Nmap, Nikto, Burp Suite, and Gobuster for network discovery, web server assessment, and directory enumeration within a Kali Linux environment.
- Documented technical findings and communicated results for security review.

SELECTED GRC PROJECT

VertexOne Digital Services -ISO/IEC 27001 & Enterprise GRC Implementation (*Simulated Enterprise Environment*)

github.com/AryanNeupane/vertexone-iso27001-isms-implementation

- Built a simulated enterprise GRC environment to practice risk assessment, risk treatment, and control implementation aligned to ISO/IEC 27001:2022 and NIST CSF 2.0.
- Developed a risk register, control register, and Statement of Applicability, supported by an evidence tracker for control testing.
- Documented internal audit findings and corrective actions, and produced an executive GRC dashboard summarizing risk, control, and remediation status.

CERTIFICATIONS & PRACTICAL TRAINING

Qualys -Vulnerability Management Foundations | Issued April 2026

Cisco -Junior Cybersecurity Analyst Career Path | Issued March 2026

Simplilearn -Introduction to CISSP Security Assessment & Testing and Security Operations | Issued March 2026

ISC2 Certified in Cybersecurity (CC) | Exam Passed; Certification Pending

TryHackMe -80+ hands-on labs completed across red team, blue team, and cybersecurity fundamentals.

EDUCATION

Bachelor of Information Management (BIM)

Tribhuvan University -Oxford College, Butwal

Expected Graduation: November 2026
